

UNIVERSITY OF OSLO

OxidOWL: Development and
Maintenance of OWL DL Reasoners
with Coding Agents

Riccardo Sieve

DL Workshop 2026

17 July 2026

Rationale

- Many DL reasoners are currently unmaintained or abandoned but still in high use

Rationale

- Many DL reasoners are currently unmaintained or abandoned but still in high use
- Lack of maintenance can result in compatibility issues with newer versions of OWL and challenges in addressing bugs

What is the goal

- Use coding agents to develop and maintain reasoners

What is the goal

- Use coding agents to develop and maintain reasoners
- Follow an iterative general approach that can be applied to different domains

What is the goal

- Use coding agents to develop and maintain reasoners
- Follow an iterative general approach that can be applied to different domains
- Validate the results and compare with existing reasoners

Thanks for the attention

See you at the poster session.
